“There is no safer place to be than with the Gurkhas” {HRH Prince Harry}

FSI Europe Ltd is a wholly-owned UK subsidiary of FSI Worldwide Ltd (“FSI”). The Group business was founded in 2006 with an initial focus on security solutions in high-threat environments (such as Iraq and Afghanistan). Since then the business has grown and indeed, diversified into different sectors and geographies. For example, FSI UK has been delivering security and manned guarding services in the UK since 2007.

FSI Europe is an award-winning business that has built a reputation for outstanding security services, as a result of its collaborative and innovative approach, coupled with the utilisation of highly professional and experienced Security Operatives (“SOs”). All FSI Europe’s SOs are appropriately qualified, licensed, and of demonstrable military pedigree. They are also all legally entitled to reside and work in the UK and have been screened to BS7858 as a minimum.

FSI has a proven track record in the delivery of security solutions and considerable experience of guarding high net worth (“HNW”) assets / persons and critical national infrastructure (“CNI”) projects. Overseas FSI guards the British Embassy in Baghdad and the US embassies in Kabul and Baghdad – this includes the private residences of the ambassador and his key diplomatic staff. In the UK, FSI has guarded a multitude of high profile clients including the US embassy, London; the Olympic Construction site in Stratford; The Manufacturing Technology Centre in Coventry; and, indirectly, Hinkley Point (C) nuclear power Station.

In UK, FSI Worldwide has Approved Contractor Status accreditation (“ACS”) from the UK Security Industry Association (“SIA”), the quality hallmark for security services and management. As a supplier to National Rail, FSI UK has maintained RISQS Qualified by Audit status since 2013 (currently holding a 5 Star rating, the highest standard achievable). FSI UK maintains active membership of a number of relevant trade and industry organisations such as:

- City of London Crime Prevention Association (“CPA”)
- NR’s Route Crime Prevention Forum
- the Spitalfields Security Forum
- the Collaborative Champions Working Group (Constructing Excellence).

“If you want to see how security should really be delivered, go and visit a FSI project “ {Harvey Soning, founder and Chairman, Templewood Security}
